PROFILE SUMMARY

Penultimate-year B.E. Computer Science and Engineering student with strong knowledge of Artificial Intelligence, Full Stack Development, and Software Engineering. Experienced in building AI-powered applications, React web applications, REST APIs, and database-driven systems using Python, JavaScript, React, Node.js, MongoDB, Supabase, and Generative AI tools. Seeking an AI Engineering / Software Engineering / Full Stack Development internship or entry-level role at a startup or product-based company to build impactful, real-world technology.

TECHNICAL SKILLS

Programming Languages: JavaScript, SQL, HTML, CSS

Frontend & Backend: React.js, Node.js

Databases: Supabase (PostgreSQL), MongoDB Atlas

AI / ML: Generative AI, Prompt Engineering, LLM-based Application Development

Developer Tools: Git, GitHub, Jira

Cloud: Vercel, Render

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering

Rajalakshmi Institute of Technology (RIT), Chennai, Poonamallee, Tamil Nadu | 2024 - 2028 *Expected Graduation: 2028*

• Currently pursuing the third year of the B.E program

PROJECTS

SevaOne — Government Schemes & Healthcare Assistance Website

React.js, Node.js, Supabase | SRM Hackathon 10.0, April 2026

- Developed a full-stack website that simplifies access to government schemes and healthcare assistance.
- Built React.js frontend components and Node.js backend functionality, using Supabase for database management.
- Implemented a scheme application workflow that generates formatted PDF documents from user-submitted details.
- Designed a configurable scheme-to-doctor mapping system to route applications to the appropriate doctors.
- Integrated WhatsApp sharing of applicant summaries and generated PDF links with assigned doctors.

Smart Campus AI | 2026

Tech Stack: React.js, Node.js, Supabase

- Developed a full-stack web application to support smart campus services through a unified platform.
- Built the React.js frontend and Node.js backend, with Supabase for database management.
- Integrated frontend and backend components to support application functionality and data handling.

Canteen Automation | 2026

- Developed a full-stack canteen management application to streamline food ordering.
- Designed features for online food ordering and queue management to improve the ordering experience.
- Included menu and inventory management capabilities to support day-to-day canteen operations.

CERTIFICATIONS

• Git, PostgreSQL, and Database Management Systems (DBMS)
• Algorithms, Agile Methodology, Jira, Software Testing, and AWS Database Services
• Issued by Simplilearn SkillUp, Scaler, Cursa/AmigosCode, and AWS Training and Certification.

ACHIEVEMENTS

• SRM Hackathon 10.0 (SRM Institute of Science and Technology), April 2026 ,Selected for Round 2
• Secured Second Prize in the Green Environment Science Quiz at Crescent College, demonstrating knowledge of environmental science and sustainability.

LANGUAGES

English, Tamil, Hindi
